

**UNITED STATES DISTRICT COURT  
FOR THE DISTRICT OF MASSACHUSETTS**

MEAGHAN ALLEN and CRYSTAL  
KENNEY, individually and on behalf of all  
others similarly situated,

Plaintiffs,

v.

PROGRESS SOFTWARE CORPORATION,

Defendant.

Case No.

**CLASS ACTION COMPLAINT**

**JURY TRIAL DEMANDED**

Plaintiffs Meaghan Allen and Crystal Kenney (“Plaintiffs”) bring this action against Progress Software Corporation (“PSC” or “Defendant”), individually and on behalf of all others similarly situated (“Class Members”), and allege upon personal knowledge as to their own actions and their counsel’s investigations, and upon information and belief as to all other matters, as follows:

**NATURE OF THE ACTION**

1. Plaintiffs bring this class action against Defendant for its failure to properly secure and safeguard personally identifiable information (“PII”) and personal health information (“PHI”) (collectively, “Private Information”) including, but not limited to, Plaintiffs and Class Members’ names, Social Security numbers, birthdates, demographic information, insurance policy numbers, and other financial information.

2. Defendant PSC is a Massachusetts based software company that offers a wide range of software products and services to corporate and governmental entities throughout the United States and the world, including cloud hosting and secure file transfer services such as MOVEit.

3. According to Allegheny County, Pennsylvania, “On June 1, 2023, the County became aware of a software vulnerability in MOVEit, which is a popular file transfer tool owned by Progress Software and used by the County to send and receive data. This vulnerability was exploited by a group of cybercriminals known as “Clop,” and allowed them to access and download files belonging to the County between May 28, 2023 - May 29, 2023.”<sup>1</sup>

4. This data breach (the “Data Breach”) involved at least the following types of information: “name; Social Security number (SSN); date of birth; driver’s license/state identification number; taxpayer identification number; and student identification numbers. For some individuals, certain types of medical information (e.g., diagnosis, treatment type, admission date), health insurance information, and billing/claim information may be involved.”<sup>2</sup>

5. During its business operations, Defendant acquired, collected, utilized, and derived a benefit from Plaintiffs’ and Class Members’ Private Information. Therefore, Defendant owed and otherwise assumed statutory, regulatory, contractual, and common law duties and obligations, including to keep Plaintiffs and Class Members’ Private Information confidential, safe, secure, and protected from the type of unauthorized access, disclosure, and theft that occurred in the Data Breach described below.

6. Despite its duties to Plaintiffs and Class Members related to and arising from its cloud hosting and secure file transfer services and applications involving MOVEit, PSC stored, maintained, and/or hosted Plaintiffs’ and Class Members’ Private Information on its MOVEit transfer services software that was negligently and/or recklessly configured and maintained so as to contain security vulnerabilities that resulted in multiple breaches of its network and systems or

---

<sup>1</sup> <https://www.alleghenycounty.us/information-technology/notice-of-data-breach.aspx>.

<sup>2</sup> *Id.*

of its customers' networks and systems. These security vulnerabilities existed as far back as 2021. As a result of the breach, unauthorized third-party cybercriminals gained access to and obtained Plaintiffs' and Class Members' Private Information.

7. Plaintiffs bring this class action lawsuit on behalf of themselves and those similarly situated to address Defendant's inadequate safeguarding of Class Members' Private Information that it collected and maintained, through its MOVEit file transfer software.

8. Upon information and belief, Defendant maintained the Private Information of millions of individuals in a negligent manner. In particular, the Private Information was maintained on computer systems and networks that utilized MOVEit, which contained security vulnerabilities. These security vulnerabilities led to dozens of cyberattacks, including the cyberattack that resulted in the theft of Plaintiffs' Private Information.

9. Upon information and belief, Defendant negligently designed, maintained, and operated the MOVEit software to store and transfer Plaintiffs' and Class Members' Private Information as the MOVEit software contained security vulnerabilities.

10. Upon information and belief, the mechanism of the Data Breach and potential for improper disclosure of Plaintiffs' and Class Members' Private Information was a known risk to Defendant because other file transfer programs had previously been subjected to criminal hacking, and thus Defendant was on notice that failing to take appropriate design and protective measures would expose and increase the risk that Private Information could be compromised and stolen.

11. The cyberattack at issue was carried out by the well-known Russian cybergang, Clop.

12. Hackers such as Clop can and do offer for sale unencrypted, unredacted Private Information to criminals. The exposed Private Information of Plaintiffs and Class Members can, and likely will, be sold repeatedly on the dark web.

13. Plaintiffs and Class Members now face a current and ongoing risk of identity theft, which is heightened here by the loss of Social Security numbers – the gold prize for identity thieves.

14. Upon information and belief, this Private Information was compromised due to Defendant's negligent and/or careless acts and omissions and the failure to protect the Private Information of Plaintiffs and Class Members.

15. When PSC's customers use MOVEit Transfer application, they entrust PSC with confidential files, including Plaintiffs' and Class Members' Private Information, and PSC accepts responsibility for securely maintaining such Private Information.

16. When Defendant's customers, including Allegheny County, use its software and services, they entrust Defendant with confidential files and information, including Plaintiffs' and Class Members' Private Information, and Defendant accepts responsibility for securely maintaining such Private Information.

17. Defendant has not made any assurances that it has adequately enhanced its data security practices to sufficiently safeguard from a similar vulnerability in the MOVEit Transfer Application in the future.

18. While many details of the Data Breach remain in the exclusive control of Defendant, upon information and belief, Defendant breached its duties and obligations by failing, in one or more of the following ways: (i) failing to design, implement, monitor, and maintain reasonable software and/or network safeguards against foreseeable threats; (ii) failing to design,

implement, and maintain reasonable data retention policies; (iii) failing to adequately train staff on data security; (iv) failing to comply with industry-standard data security practices; (v) failing to warn Plaintiffs and Class Members of Defendant's inadequate data security practices; (vi) failing to encrypt or adequately encrypt the Private Information; and (vii) otherwise failing to secure the software and hardware using reasonable and effective data security procedures free of foreseeable vulnerabilities and data security incidents.

19. As a result of Defendant's unreasonable and inadequate data security practices that resulted in the Data Breach, Plaintiffs and Class Members are at a current and ongoing risk of identity theft and have suffered numerous actual and concrete injuries and damages, including: (i) invasion of privacy; (ii) financial "out-of-pocket" costs incurred mitigating the materialized risk and imminent threat of identity theft; (iii) loss of time and loss of productivity incurred mitigating the materialized risk and imminent threat of identity theft risk; (iv) financial "out-of-pocket" costs incurred due to actual identity theft; (v) loss of time incurred due to actual identity theft; (vi) loss of time due to increased spam and targeted marketing emails; (vii) diminution of value of their Private Information; (viii) anxiety, annoyance, and nuisance; and (ix) the continued risk to their Private Information, which remains in the control of Defendant, and which is subject to further breaches, as long as Defendant fails to undertake appropriate and adequate measures to protect Plaintiffs' and Class Members' Private Information.

20. Plaintiffs seek to remedy these harms on behalf of themselves and all similarly situated individuals whose Private Information was accessed during the Data Breach. Plaintiffs seek remedies including, but not limited to, compensatory damages, reimbursement of out-of-pocket costs, future costs of identity theft monitoring, injunctive relief including improvements to Defendant's data security systems, and future annual audits.

21. Accordingly, Plaintiffs bring this action against Defendant seeking redress for its unlawful conduct and asserting claims for: (i) negligence; (ii) breach of third-party beneficiary contract; (iii) negligence per se; (iv) unjust enrichment; and (v) declaratory judgment.<sup>3</sup>

### **PARTIES**

22. Plaintiff Meaghan Allen is, and at all times mentioned herein was, an individual citizen of the Commonwealth of Pennsylvania.

23. Plaintiff Crystal Kenney is, and at all times mentioned herein was, an individual citizen of the Commonwealth of Pennsylvania.

24. Defendant Progress Software Corporation is a for profit corporation organized under the laws of the State of Delaware with its principal place of business located at 15 Wayside Road, Suite 4, Burlington, Massachusetts 01803. Service of process is proper on Corporation Service Company as agent located at 84 State Street, Boston, Massachusetts 02109.

### **JURISDICTION AND VENUE**

25. This Court has subject matter jurisdiction over this action under the Class Action Fairness Act, 28 U.S.C. § 1332(d)(2). The amount in controversy exceeds \$5 million, exclusive of interest and costs. The number of class members exceeds 100, many of whom, including Plaintiffs, have different citizenship from Defendant. Thus, minimal diversity exists under 28 U.S.C. § 1332(d)(2)(A).

26. This Court has personal jurisdiction over Defendant because it conducts substantial business in this jurisdiction and because Plaintiffs' claims arise out of or relate to Defendant's

---

<sup>3</sup> Plaintiffs will serve notice as required under M.G.L. ch. 93A and intends to amend the Complaint to add a cause of action under that statute.

contacts with, and conduct within, this District. Further, this Court has general jurisdiction over Defendant because its corporate headquarters is located in this District.

27. Venue is proper in this Court pursuant to 28 U.S.C. § 1391(a)(1) because a substantial part of the events giving rise to this action occurred in this District. Moreover, Defendant is based in this District, Defendant designed, marketed, sold, and maintained the MOVEit transfer application in this District, and the harm caused to Plaintiffs and Class Members emanated from this District.

### **FACTUAL ALLEGATIONS**

#### ***PSC's Business***

28. PSC, which is based in Burlington, Massachusetts, is a software company that offers a wide range of products and services to government agencies and corporate entities across the United States and around the world, including MOVEit.

29. MOVEit is a “[m]anaged File Transfer and automation software that guarantees the security of sensitive files both at-rest and in-transit, ensures reliable business processes and addresses data security compliance requirements.”<sup>4</sup>

30. As a condition of receiving secure file transfer services, PSC requires that its government and corporate customers entrust it and its MOVEit transfer software application with highly sensitive Private Information belonging to Plaintiffs and Class Members.

31. Because of the highly sensitive nature of the Private Information that PSC acquires, maintains, and transfers, PSC “guarantees the security of sensitive files,”<sup>5</sup> and promises, among other things, to: keep customers’ files private; comply with industry standards related to data

---

<sup>4</sup> *Progress Brochure*, available at [https://d117h1jjiq768j.cloudfront.net/docs/default-source/default-document-library/progress-corporate-brochure-2023-rgb.pdf?sfvrsn=a0b1f671\\_3](https://d117h1jjiq768j.cloudfront.net/docs/default-source/default-document-library/progress-corporate-brochure-2023-rgb.pdf?sfvrsn=a0b1f671_3) (last visited June 22, 2023).

<sup>5</sup> *Id.*

security and maintenance of its customers' files and the Private Information contained therein; only disclose the sensitive information for business purposes and reasons related to the services it provides; and provide adequate notice to individuals if their Private Information is disclosed without authorization.

32. By obtaining, collecting, using, and deriving a benefit from Plaintiffs and Class Members' Private Information, PSC assumed legal and equitable duties and knew or should have known that it was responsible for ensuring the security of Plaintiffs' and Class Members' Private Information to protect it from unauthorized disclosure and exfiltration.

33. Plaintiffs and Class Members relied on PSC to keep their Private Information confidential and securely maintained and to only make authorized disclosures of this information, which PSC failed to do.

#### ***Allegheny County***

34. Allegheny County is a county of the Commonwealth of Pennsylvania. Allegheny County receives and maintains certain information about residents, citizens, taxpayers, and employees of the county in order to provide government benefits and services. As part of this relationship, Allegheny County requires that individuals, including Plaintiffs and Class Members, entrust it with highly sensitive Private Information.

35. Allegheny County uses MOVEit file transfer services to send and receive data, including the following information: name; Social Security number (SSN); date of birth; driver's license/state identification number; taxpayer identification number; and student identification numbers. For some individuals, certain types of medical information (e.g., diagnosis, treatment

type, admission date), health insurance information, and billing/claim information may be involved.<sup>6</sup>

### ***The Data Breach***

36. On May 31, 2023, PSC reported a vulnerability in MOVEit Transfer and MOVEit Cloud (CVE-2023-34362) that could lead to escalated privileges and potential unauthorized access to the environment. PSC purportedly launched an investigation, alerted MOVEit customers of the issue and provided mitigation steps.<sup>7</sup>

37. PSC applied additional patches on June 9 and June 16 to purportedly address other vulnerabilities that were discovered.<sup>8</sup>

38. The Russian cyber gang Clap took responsibility for the attack—which began on May 27, 2023—and began attempts to ransom and exploit data accessed from MOVEit.<sup>9</sup>

39. Allegheny County was one of the entities whose data was accessed and stolen, which included Private Information of millions of individuals, including Plaintiffs and Class Members.

40. Allegheny County began informing individuals affected by the Data Breach on or around July 28, 2023, with letters being sent to some affected individuals including Plaintiffs regarding their information which was accessed and stolen and precautions which they should take to try and protect their PII as well as prevent further harm and damage.

41. Defendant negligently maintained Plaintiffs' and Class Members' Private Information, which allowed unauthorized cybercriminals to access and exfiltrate the Private

---

<sup>6</sup> <https://www.alleghenycounty.us/information-technology/notice-of-data-breach.aspx>.

<sup>7</sup> <https://www.progress.com/security/moveit-transfer-and-moveit-cloud-vulnerability>.

<sup>8</sup> *Id.*

<sup>9</sup> <https://www.bleepingcomputer.com/news/security/clap-ransomware-gang-starts-extorting-moveit-data-theft-victims/>.

Information through the Data Breach, including, but not limited to, Social Security numbers, financial information, and driver's licenses.

42. Defendant had obligations created by contract, industry standards, common law, and representations made to Plaintiffs and Class Members to keep Plaintiffs' and Class Members' Private Information confidential and to protect them from unauthorized access and disclosure.

43. Plaintiffs and Class Members permitted their Private Information to be provided to Defendant with the reasonable expectation and understanding that Defendant would comply with its obligations to keep said Private Information confidential and secure from unauthorized access and timely notify Class Members of any security breaches.

44. Defendant's data security obligations were particularly important given the substantial increase in cyberattacks in recent years, including recent similar attacks against secure file transfer companies such as Accellion and Fortra by the same Russian cyber gang, Clop.<sup>10</sup>

45. Therefore, because of the type of data and Private Information maintained, Defendant knew or should have known that its systems and records would be targeted by cybercriminals.

### ***Plaintiff Meaghan Allen's Experience***

46. Plaintiff Allen is very careful about sharing her sensitive Private Information and diligently maintains her Private Information in a safe and secure manner. Plaintiff Allen has never knowingly transmitted unencrypted sensitive Private Information over the internet or any other unsecured source.

---

<sup>10</sup> See Bill Toulas, *Fortra Shares Findings on GoAnywhere MFT Zero-Day Attacks*, BleepingComputer (Apr. 19, 2023), <https://www.bleepingcomputer.com/news/security/fortra-shares-findings-on-goanywhere-mft-zero-day-attacks/>; see also Ionut Ilascu, *Global Accellion Data Breaches Linked to Clop Ransomware Gang*, BleepingComputer (Feb. 22, 2021), <https://www.bleepingcomputer.com/news/security/global-accellion-data-breaches-linked-to-clop-ransomware-gang/>.

47. Plaintiff Allen provided her Private Information to Allegheny County as required to obtain or apply for, *inter alia*, SNAP benefits, Low Income Home Energy Assistance Program benefits, Section 8 housing benefits, and Medicaid.

48. Plaintiff Allen subsequently received a letter from Allegheny County stating that Plaintiff Allen's Private Information had been compromised as a result of the Data Breach.

49. As a result of the Data Breach, Plaintiff Allen has and will continue to spend time trying to mitigate the consequences of the Data Breach. This includes time spent verifying the legitimacy of communications related to the Data Breach, and self-monitoring her accounts and credit reports to ensure no fraudulent activity has occurred. This time has been lost forever and cannot be recaptured.

50. Plaintiff Allen has experienced unusual activity on her financial accounts, including an unexplained withdrawal of cash and adding charges to her cable account.

51. The harm caused to Plaintiff Allen cannot be undone.

52. Plaintiff Allen further suffered actual injury in the form of damages to and diminution in the value of her Private Information—a form of intangible property that Plaintiff Allen entrusted to Defendant, which was compromised in and as a result of the Data Breach.

53. Plaintiff Allen suffered lost time, annoyance, interference, and inconvenience because of the Data Breach and has anxiety and increased concerns for the loss of her privacy.

54. Plaintiff Allen has suffered imminent and impending injury arising from the present and ongoing risk of fraud, identity theft, and misuse resulting from her Private Information being placed in the hands of cybercriminals.

55. Future identity theft monitoring is reasonable and necessary and such services will include future costs and expenses.

56. Plaintiff Allen has a continuing interest in ensuring that her Private Information, which, upon information and belief, remains in Defendant's control, is protected, and safeguarded from future breaches.

***Plaintiff Crystal Kenney's Experience***

57. Plaintiff Kenney is very careful about sharing her sensitive Private Information and diligently maintains her Private Information in a safe and secure manner. Plaintiff Kenney has never knowingly transmitted unencrypted sensitive Private Information over the internet or any other unsecured source.

58. Plaintiff Kenney provided her Private Information to Allegheny County as required to obtain or apply for, *inter alia*, SNAP benefits, Low Income Home Energy Assistance Program benefits, Section 8 housing benefits, and unemployment insurance. Plaintiff Kenney subsequently received a letter from Allegheny County stating that Plaintiff Kenney's Private Information had been compromised as a result of the Data Breach.

59. As a result of the Data Breach, Plaintiff Kenney has and will continue to spend time trying to mitigate the consequences of the Data Breach. This includes time spent verifying the legitimacy of communications related to the Data Breach, and self-monitoring her accounts and credit reports to ensure no fraudulent activity has occurred. This time has been lost forever and cannot be recaptured.

60. The harm caused to Plaintiff Kenney cannot be undone.

61. Plaintiff Kenney further suffered actual injury in the form of damages to and diminution in the value of her Private Information—a form of intangible property that Plaintiff Kenney entrusted to Defendant, which was compromised in and as a result of the Data Breach.

62. Plaintiff Kenney suffered lost time, annoyance, interference, and inconvenience

because of the Data Breach and has anxiety and increased concerns for the loss of her privacy.

63. Plaintiff Kenney has suffered imminent and impending injury arising from the present and ongoing risk of fraud, identity theft, and misuse resulting from her Private Information being placed in the hands of cybercriminals.

64. Future identity theft monitoring is reasonable and necessary and such services will include future costs and expenses.

65. Plaintiff Kenney has a continuing interest in ensuring that her Private Information, which, upon information and belief, remains in Defendant's control, is protected, and safeguarded from future breaches.

***The Data Breach Was Foreseeable***

66. At all relevant times, Defendant knew, or reasonably should have known, of the importance of safeguarding the Private Information of Plaintiffs and Class Members and the foreseeable consequences that would occur if Defendant's data security system was breached, including, specifically, the significant costs that would be imposed on Plaintiffs and Class Members because of a breach.

67. Defendant was, or should have been, fully aware of the unique type and the significant volume of data on its network, amounting to potentially millions of individuals' detailed, Private Information and, thus, the significant number of individuals who would be harmed by the exposure of the unencrypted data.

68. As explained by the Federal Bureau of Investigation ("FBI"), "[p]revention is the most effective defense against ransomware and it is critical to take precautions for protection."<sup>11</sup>

---

<sup>11</sup> See How to Protect Your Networks from RANSOMWARE, at 3, available at <https://www.fbi.gov/file-repository/ransomware-prevention-and-response-for-cisos.pdf/view> (last accessed June 22, 2023).

69. Defendant's data security obligations were particularly important given the substantial increase in cyberattacks and/or data breaches preceding the date of the breach.

70. In 2022, 1,774 data breaches occurred, affecting approximately 392,000,000 victims.<sup>12</sup>

71. In light of the recent high profile cybersecurity incidents at other file transfer and storage companies, including Accellion and Fortra, Defendant knew or should have known that its electronic records would be targeted by cybercriminals.

72. Indeed, cyberattacks have become so notorious that the FBI and U.S. Secret Service have issued a warning to potential targets so they are aware of, and prepared for, a potential attack.<sup>13</sup>

73. Therefore, the increase in such attacks, and the attendant risk of future attacks, were widely known to the public and to anyone in Defendant's industry, including Defendant.

### ***Value of Private Information***

74. Individuals' Private Information remains of high value to criminals, as evidenced by the prices offered through the dark web. Numerous sources cite dark web pricing for stolen identity credentials. For example, personal information can be sold at a price ranging from \$40 to \$200, and bank details have a price range of \$50 to \$200.<sup>14</sup> According to the Dark Web Price Index for 2021, payment card details for an account balance up to \$1,000 have an average market value of \$150, credit card details with an account balance up to \$5,000 have an average market value of

---

<sup>12</sup> See 2022 Data Breach Annual Report, available at <https://www.idtheftcenter.org/publication/2022-data-breach-report/>.

<sup>13</sup> FBI, Secret Service Warn of Targeted, Law360 (Nov.18,2019), <https://www.law360.com/articles/1220974/fbisecret-service-warn-of-targeted-ransomware>.

<sup>14</sup> *Your personal data is for sale on the dark web. Here's how much it costs*, Digital Trends, Oct. 16, 2019, available at: <https://www.digitaltrends.com/computing/personal-data-sold-on-the-dark-web-how-much-it-costs/>. (last accessed June 22, 2023).

\$240, stolen online banking logins with a minimum of \$100 on the account have an average market value of \$40, and stolen online banking logins with a minimum of \$2,000 on the account have an average market value of \$120.<sup>15</sup> Criminals can also purchase access to entire company data breaches from \$900 to \$4,500.<sup>16</sup>

75. Based on the foregoing, the information compromised in the Data Breach is significantly more valuable than the loss of, for example, credit card information in a retailer data breach because, there, victims can cancel or close credit and debit card accounts.

76. This data demands a much higher price on the black market. Martin Walter, senior director at cybersecurity firm RedSeal, explained, “Compared to credit card information, personally identifiable information...[is] worth more than 10x on the black market.”<sup>17</sup>

77. Among other forms of fraud, identity thieves may obtain driver’s licenses, government benefits, medical services, and housing or even give false information to police.

78. The fraudulent activity resulting from the Data Breach may not come to light for years.

79. There is also a robust legitimate market for the type of Private Information at issue here. Marketing firms utilize Private Information to target potential customers, and an entire economy exists related to the value of personal data.

80. Moreover, there may be a time lag between when harm occurs versus when it is discovered and also between when Private Information is stolen and when it is used. According to

---

<sup>15</sup> *Dark Web Price Index 2021*, Zachary Ignoffo, March 8, 2021, available at: <https://www.privacyaffairs.com/dark-web-price-index-2021/> (last accessed June. 22, 2023).

<sup>16</sup> *In the Dark*, VPNOverview, 2019, available at: <https://vpnoverview.com/privacy/anonymous-browsing/in-the-dark/>.

<sup>17</sup> Time Greene, *Anthem Hack: Personal Data Stolen Sells for 10x Price of Stolen Credit Card Numbers*, IT World, (Feb. 6, 2015), available at: <https://www.networkworld.com/article/2880366/anthem-hack-personal-data-stolen-sells-for-10x-price-of-stolen-credit-card-numbers.html> (last accessed June. 22, 2023).

the U.S. Government Accountability Office (“GAO”), which conducted a study regarding data breaches:

[L]aw enforcement officials told us that in some cases, stolen data may be held for up to a year or more before being used to commit identity theft. Further, once stolen data have been sold or posted on the Web, fraudulent use of that information may continue for years. As a result, studies that attempt to measure the harm resulting from data breaches cannot necessarily rule out all future harm.<sup>18</sup>

81. As such, future monitoring of financial and personal records is reasonable and necessary.

***Defendant Failed to Properly Protect Plaintiffs’ and Class Members’ Private Information***

82. Defendant could have prevented this Data Breach by properly testing, monitoring, auditing, securing, and encrypting the systems containing the Private Information of Plaintiffs and Class Members.

83. Defendant’s negligence in not safeguarding the Private Information of Plaintiffs and Class Members is exacerbated by the repeated warnings and alerts directed to companies like Defendant to protect and secure sensitive data they maintain.

84. Despite the prevalence of public announcements of data breach and data security compromises, Defendant failed to take appropriate steps to protect the Private Information of Plaintiffs and Class Members from being compromised.

85. The Federal Trade Commission (“FTC”) defines identity theft as “a fraud committed or attempted using the identifying information of another person without authority.” The FTC describes “identifying information” as “any name or number that may be used, alone or in conjunction with any other information, to identify a specific person,” including, among other

---

<sup>18</sup> *Report to Congressional Requesters*, GAO, at 29 (June 2007), available at: <https://www.gao.gov/assets/gao-07-737.pdf> (last accessed June 22, 2023).

things, “[n]ame, Social Security number, date of birth, official State or government issued driver’s license or identification number, alien registration number, government passport number, employer or taxpayer identification number.”<sup>19</sup>

86. The ramifications of Defendant’s failure to keep secure the Private Information of Plaintiffs and Class Members are long lasting and severe. Once Private Information is stolen, fraudulent use of that information and damage to victims may continue for years.

87. To prevent and detect unauthorized cyber-attacks, Defendant could and should have implemented, as recommended by the United States Government, the following measures:

- Implement an awareness and training program. Because end users are targets, employees and individuals should be aware of the threat of ransomware and how it is delivered.
- Enable strong spam filters to prevent phishing emails from reaching the end users and authenticate inbound email using technologies like Sender Policy Framework (SPF), Domain Message Authentication Reporting and Conformance (DMARC), and DomainKeys Identified Mail (DKIM) to prevent email spoofing.
- Scan all incoming and outgoing emails to detect threats and filter executable files from reaching end users.
- Configure firewalls to block access to known malicious IP addresses.
- Patch operating systems, software, and firmware on devices. Consider using a centralized patch management system.
- Set anti-virus and anti-malware programs to conduct regular scans automatically.
- Manage the use of privileged accounts based on the principle of least privilege: no users should be assigned administrative access unless absolutely needed; and those with a need for administrator accounts should only use them when necessary.
- Configure access controls—including file, directory, and network share

---

<sup>19</sup> See generally *Fighting Identity Theft With the Red Flags Rule: A How-To Guide for Business*, FED. TRADE COMM., <https://www.ftc.gov/business-guidance/resources/fighting-identity-theft-red-flags-rule-how-guide-business> (last accessed June 22, 2023).

permissions—with least privilege in mind. If a user only needs to read specific files, the user should not have write access to those files, directories, or shares.

- Disable macro scripts from office files transmitted via email. Consider using Office Viewer software to open Microsoft Office files transmitted via email instead of full office suite applications.
- Implement Software Restriction Policies (SRP) or other controls to prevent programs from executing from common ransomware locations, such as temporary folders supporting popular Internet browsers or compression/decompression programs, including the AppData/LocalAppData folder.
- Consider disabling Remote Desktop protocol (RDP) if it is not being used.
- Use application whitelisting, which only allows systems to execute programs known and permitted by security policy.
- Execute operating system environments or specific programs in a virtualized environment.
- Categorize data based on organizational value and implement physical and logical separation of networks and data for different organizational units.<sup>20</sup>

88. To prevent and detect cyber-attacks, including the cyber-attack that resulted in the Data Breach, Defendant could and should have implemented, as recommended by the United States Cybersecurity & Infrastructure Security Agency, the following measures:

- **Update and patch your computer.** Ensure your applications and operating systems (OSs) have been updated with the latest patches. Vulnerable applications and OSs are the target of most ransomware attacks....
- **Use caution with links and when entering website addresses.** Be careful when clicking directly on links in emails, even if the sender appears to be someone you know. Attempt to independently verify website addresses (e.g., contact your organization's helpdesk, search the internet for the sender organization's website or the topic mentioned in the email). Pay attention to the website addresses you click on, as well as those you enter yourself. Malicious website addresses often appear almost identical to legitimate sites, often using a slight variation in spelling or a different domain (e.g., .com instead of .net)....
- **Open email attachments with caution.** Be wary of opening email attachments, even

---

<sup>20</sup> *Id.* at 3-4.

from senders you think you know, particularly when attachments are compressed files or ZIP files.

- **Keep your personal information safe.** Check a website's security to ensure the information you submit is encrypted before you provide it....
- **Verify email senders.** If you are unsure whether or not an email is legitimate, try to verify the email's legitimacy by contacting the sender directly. Do not click on any links in the email. If possible, use a previous (legitimate) email to ensure the contact information you have for the sender is authentic before you contact them.
- **Inform yourself.** Keep yourself informed about recent cybersecurity threats and up to date on ransomware techniques. You can find information about known phishing attacks on the Anti-Phishing Working Group website. You may also want to sign up for CISA product notifications, which will alert you when a new Alert, Analysis Report, Bulletin, Current Activity, or Tip has been published.
- **Use and maintain preventative software programs.** Install antivirus software, firewalls, and email filters—and keep them updated—to reduce malicious network traffic....<sup>21</sup>

89. To prevent and detect cyber-attacks, including the cyber-attack that resulted in the Data Breach, Defendant could and should have implemented, as recommended by the Microsoft Threat Protection Intelligence Team, the following measures:

#### **Secure internet-facing assets**

- Apply latest security updates
- Use threat and vulnerability management
- Perform regular audit; remove privileged credentials

#### **Thoroughly investigate and remediate alerts**

- Prioritize and treat commodity malware infections as potential full compromise

#### **Include IT Pros in security discussions**

- Ensure collaboration among [security operations], [security admins], and [information technology] admins to configure servers and other endpoints securely

---

<sup>21</sup> See Security Tip (ST19-001) Protecting Against Ransomware (original release date Apr. 11, 2019), available at <https://www.cisa.gov/news-events/news/protecting-against-ransomware> (last accessed June 23, 2023).

### **Build credential hygiene**

- Use [multifactor authentication] or [network level authentication] and use strong, randomized, just-in-time local admin passwords

### **Apply principle of least-privilege**

- Monitor for adversarial activities
- Hunt for brute force attempts
- Monitor for cleanup of Event Logs
- Analyze logon events

### **Harden infrastructure**

- Use Windows Defender Firewall
- Enable tamper protection
- Enable cloud-delivered protection
- Turn on attack surface reduction rules and [Antimalware Scan Interface] for Office [Visual Basic for Applications]<sup>22</sup>

90. Moreover, given that Defendant was maintaining the Private Information of Plaintiffs and Class Members, Defendant could and should have implemented all the above measures to prevent and detect cyberattacks.

91. The occurrence of the Data Breach indicates that Defendant failed to adequately implement one or more of the above measures to prevent cyberattacks, resulting in the Data Breach and the exposure of the Private Information of Plaintiffs and Class Members.

92. Because Defendant failed to properly protect and safeguard Plaintiffs' and Class Members' Private Information, an unauthorized criminal third party was able to access Defendant's network, and access Defendant's database and system configuration files and exfiltrate that data.

### ***Defendant Failed to Comply with FTC Guidelines***

---

<sup>22</sup> See Human-operated ransomware attacks: A preventable disaster (Mar 5, 2020), *available at* <https://www.microsoft.com/security/blog/2020/03/05/human-operated-ransomware-attacks-a-preventable-disaster/> (last accessed June 22, 2023).

93. The FTC has promulgated numerous guides for businesses which highlight the importance of implementing reasonable data security practices. According to the FTC, the need for data security should be factored into all business decision making.

94. In 2016, the FTC updated its publication, Protecting Personal Information: A Guide for Business, which established cyber-security guidelines for businesses. The guidelines note that businesses should protect the personal information that they keep; properly dispose of personal information that is no longer needed; encrypt information stored on computer networks; understand their network's vulnerabilities; and implement policies to correct any security problems.<sup>23</sup>

95. The guidelines also recommend that businesses use an intrusion detection system to expose a breach as soon as it occurs; monitor all incoming traffic for activity indicating someone is attempting to hack the system; watch for large amounts of data being transmitted from the system; and have a response plan ready in the event of a breach.

96. The FTC further recommends that companies not maintain Private Information longer than is needed for authorization of a transaction; limit access to sensitive data; require complex passwords to be used on networks; use industry-tested methods for security; monitor for suspicious activity on the network; and verify that third-party service providers have implemented reasonable security measures.

97. Defendant failed to properly implement basic data security practices.

98. Defendant's failure to employ reasonable and appropriate measures to protect

---

<sup>23</sup> Protecting Personal Information: A Guide for Business, Federal Trade Commission (2016). Available at <https://www.ftc.gov/business-guidance/resources/protecting-personal-information-guide-business> (last accessed June 22, 2023).

against unauthorized access to Plaintiffs' and Class Members' Private Information constitutes an unfair act or practice prohibited by Section 5 of the FTC Act, 15 U.S.C. § 45.

99. Defendant was always fully aware of its obligation to protect the Private Information of Plaintiffs and Class Members. Defendant was also aware of the significant repercussions that would result from its failure to do so.

***Defendant Failed to Comply with Industry Standards for Data Security***

100. In light of the numerous high-profile data breaches targeting companies like Target, Neiman Marcus, eBay, Anthem, Deloitte, Equifax, Marriott, T-Mobile, and Capital One, Defendant was, or reasonably should have been, aware of the importance of safeguarding Private Information, as well as of the foreseeable consequences of its systems being breached.

101. Security standards commonly accepted among businesses that store Private Information using the internet include, without limitation:

- a. Maintaining a secure firewall configuration;
- b. Monitoring for suspicious or irregular traffic to servers;
- c. Monitoring for suspicious credentials used to access servers;
- d. Monitoring for suspicious or irregular activity by known users;
- e. Monitoring for suspicious or unknown users;
- f. Monitoring for suspicious or irregular server requests;
- g. Monitoring for server requests for Private Information;
- h. Monitoring for server requests from VPNs; and
- i. Monitoring for server requests from Tor exit nodes.

102. The FTC publishes guides for businesses for cybersecurity<sup>24</sup> and protection of Private Information<sup>25</sup> which includes basic security standards applicable to all types of businesses.

103. The FTC recommends that businesses:

- a. Identify all connections to the computers where you store sensitive information.
- b. Assess the vulnerability of each connection to commonly known or reasonably foreseeable attacks.
- c. Do not store sensitive consumer data on any computer with an internet connection unless it is essential for conducting their business.
- d. Scan computers on their network to identify and profile the operating system and open network services. If services are not needed, they should be disabled to prevent hacks or other potential security problems. For example, if email service or an internet connection is not necessary on a certain computer, a business should consider closing the ports to those services on that computer to prevent unauthorized access to that machine.
- e. Pay particular attention to the security of their web applications—the software used to give information to visitors to their websites and to retrieve information from them. Web applications may be particularly vulnerable to a variety of hacker attacks.
- f. Use a firewall to protect their computers from hacker attacks while it is connected to a network, especially the internet.
- g. Determine whether a border firewall should be installed where the business's network connects to the internet. A border firewall separates the network from the internet and may prevent an attacker from gaining access to a computer on the network where sensitive information is stored. Set access controls—settings that determine which devices and traffic get through the firewall—to allow only trusted devices with a legitimate business need to access the network. Since the protection a firewall provides is only as effective as its access controls, they should be reviewed periodically.

---

<sup>24</sup> Start with Security: A Guide for Business, FTC (June 2015), <https://www.ftc.gov/system/files/documents/plain-language/pdf0205-startwithsecurity.pdf>. (last accessed June 23, 2023).

<sup>25</sup> Protecting Personal Information: A Guide for Business, Federal Trade Commission (2016). Available at <https://www.ftc.gov/business-guidance/resources/protecting-personal-information-guide-business> (last accessed June 22, 2023).

- h. Monitor incoming traffic for signs that someone is trying to hack in. Keep an eye out for activity from new users, multiple log-in attempts from unknown users or computers, and higher-than-average traffic at unusual times of the day.
- i. Monitor outgoing traffic for signs of a data breach. Watch for unexpectedly large amounts of data being transmitted from their system to an unknown user. If large amounts of information are being transmitted from a business' network, the transmission should be investigated to make sure it is authorized.

104. The FTC has brought enforcement actions against businesses for failing to adequately and reasonably protect customer information, treating the failure to employ reasonable and appropriate measures to protect against unauthorized access to confidential consumer data as an unfair act or practice prohibited by Section 5 of the Federal Trade Commission Act, 15 U.S.C. § 45. Orders resulting from these actions further clarify the measures businesses must take to meet their data security obligations.<sup>26</sup>

105. Because Defendant was entrusted with Private Information, it had, and has, a duty to keep the Private Information secure.

106. Plaintiffs and Class Members reasonably expect that when their Private Information is provided to a sophisticated business for a specific purpose, that business will safeguard their Private Information and use it only for that purpose.

107. Nonetheless, Defendant failed to prevent the Data Breach. Had Defendant properly maintained and adequately protected its systems, it could have prevented the Data Breach.

108. Other best cybersecurity practices that are standard include installing appropriate malware detection software; monitoring and limiting the network ports; protecting web browsers and email management systems; setting up network systems such as firewalls, switches and routers; monitoring and protection of physical security systems; protection against any possible

---

<sup>26</sup> Federal Trade Commission, *Privacy and Security Enforcement: Press Releases*, <https://www.ftc.gov/news-events/media-resources/protecting-consumer-privacy/privacy-security-enforcement>.

communication system; and training staff regarding critical points.

109. Defendant failed to meet the minimum standards of any of the following frameworks: the NIST Cybersecurity Framework Version 1.1 (including without limitation PR.AC-1, PR.AC-3, PR.AC-4, PR.AC-5, PR.AC-6, PR.AC-7, PR.AT-1, PR.DS-1, PR.DS-5, PR.PT-1, PR.PT-3, DE.CM-1, DE.CM-4, DE.CM-7, DE.CM-8, and RS.CO-2), and the Center for Internet Security's Critical Security Controls (CIS CSC), which are all established standards in reasonable cybersecurity readiness.

110. The foregoing frameworks are existing and applicable industry standards in the software and data management/transfer industry, and Defendant failed to comply with these accepted standards, thereby opening the door to and causing the Data Breach.

111. Upon information and belief, Defendant failed to comply with one or more of the foregoing industry standards.

***Defendant's Negligent Acts and Breaches***

112. Defendant participated and controlled the process of gathering the Private Information from Plaintiffs and Class Members.

113. Defendant therefore assumed and otherwise owed duties and obligations to Plaintiffs and Class Members to take reasonable measures to protect the information, including the duty of oversight, training, instruction, and testing of the data security policies and network systems. Defendant breached these obligations to Plaintiffs and Class Members and/or was otherwise negligent because it failed to properly implement data security systems and policies for its network that would adequately safeguarded Plaintiffs' and Class Members' Private Information. Upon information and belief, Defendant's unlawful conduct included, but is not limited to, one or more of the following acts and/or omissions:

- a. Failing to design and maintain an adequate data security system to reduce the risk of data breaches and protect Plaintiffs' and Class Members Private Information;
- b. Failing to properly monitor its data security systems for data security vulnerabilities and risk;
- c. Failing to audit, test and assess the adequacy of its data security system;
- d. Failing to develop adequate training programs related to the proper handling of emails and email security practices;
- e. Failing to put into develop and place uniform procedures and data security protections for its network;
- f. Failing to adequately fund and allocate resources for the adequate design, operation, maintenance, and updating necessary to meet industry standards for data security protection;
- g. Failing to ensure or otherwise require that it was compliant with FTC guidelines for cybersecurity;
- h. Failing to ensure or otherwise require that it was adhering to one or more of industry standards for cybersecurity discussed above;
- i. Failing to implement or update antivirus and malware protection software in need of security updating;
- j. Failing to require encryption or adequate encryption on its data systems;
- k. Otherwise negligently and unlawfully failing to safeguard Plaintiffs' and Class Members' Private Information provided to Defendant, which in turn allowed cyberthieves to access its IT systems.

### ***HIPAA Standards and Violations***

114. In addition to failing to follow universal data security practices, Defendant failed to follow healthcare industry standard security practices, including:

- a. Failing to protect against any reasonably anticipated threats or hazards to the security or integrity of electronic PHI in violation of 45 C.F.R. 164.306(a)(2);
- b. Failing to ensure compliance with HIPAA security standards by its workforce or agents in violation of 45 C.F.R 164.306(a)(94);
- c. Failing to effectively train all members of its workforce and its agents on the

policies and procedures with respect to PHI as necessary to maintain the security of PHI in violation of C.F.R. 164.530(b) and 45 C.F.R. 164.308(a)(5); and

- d. Failing to design and implement and enforce policies and procedures to establish administrative safeguards to reasonably safeguard PHI in compliance with 45 C.F.R. 164.530(c).

### **COMMON INJURIES & DAMAGES**

115. As result of Defendant's ineffective and inadequate data security practices, Plaintiffs and Class Members now face a present and ongoing risk of fraud and identity theft.

116. Due to the Data Breach, and the foreseeable consequences of Private Information ending up in the possession of criminals, the risk of identity theft to Plaintiffs and Class Members has materialized and is imminent, and Plaintiffs and Class Members have all sustained actual injuries and damages, including: (i) invasion of privacy; (ii) "out-of-pocket" costs incurred mitigating the materialized risk and imminent threat of identity theft; (iii) loss of time and loss of productivity incurred mitigating the materialized risk and imminent threat of identity theft risk; (iv) "out-of-pocket" costs incurred due to actual identity theft; (v) loss of time incurred due to actual identity theft; (vi) loss of time due to increased spam and targeted marketing emails; (vii) diminution of value of their Private Information; and (viii) the continued risk to their Private Information, which remains in Defendant's control, and which is subject to further breaches, so long as Defendant fails to undertake appropriate and adequate measures to protect Plaintiffs' and Class Members' Private Information.

#### ***The Risk of Identity Theft to Plaintiffs and Class Members Is Present and Ongoing***

117. The link between a data breach and the risk of identity theft is simple and well established. Criminals acquire and steal Private Information to monetize the information. Criminals monetize the data by selling the stolen information on the black market to other criminals who then utilize the information to commit a variety of identity theft related crimes

discussed below.

118. Because a person's identity is akin to a puzzle with multiple data points, the more accurate pieces of data an identity thief obtains about a person, the easier it is for the thief to take on the victim's identity – or track the victim to attempt other hacking crimes against the individual to obtain more data to perfect a crime.

119. For example, armed with just a name and date of birth, a data thief can utilize a hacking technique referred to as “social engineering” to obtain even more information about a victim's identity, such as a person's login credentials or Social Security number. Social engineering is a form of hacking whereby a data thief uses previously acquired information to manipulate and trick individuals into disclosing additional confidential or personal information through means such as spam phone calls and text messages or phishing emails. Data breaches are often the starting point for these additional targeted attacks on the victims.

120. The dark web is an unindexed layer of the internet that requires special software or authentication to access.<sup>27</sup> Criminals in particular favor the dark web as it offers a degree of anonymity to visitors and website publishers. Unlike the traditional or ‘surface’ web, dark web users need to know the web address of the website they wish to visit in advance. For example, on the surface web, the CIA's web address is cia.gov, but on the dark web the CIA's web address is ciadotgov4sjwlzihbbgxnqg3xiyrg7so2r2o3lt5wz5ypk4sxyjstad.onion.<sup>28</sup> This prevents dark web marketplaces from being easily monitored by authorities or accessed by those not in the know.

121. A sophisticated black market exists on the dark web where criminals can buy or sell malware, firearms, drugs, and frequently, personal information like the Private Information at

---

<sup>27</sup> *What Is the Dark Web?*, Experian, available at <https://www.experian.com/blogs/ask-experian/what-is-the-dark-web/>. (last accessed June 22, 2023).

<sup>28</sup> *Id.*

issue here.<sup>29</sup> The digital character of Private Information stolen in data breaches lends itself to dark web transactions because it is immediately transmissible over the internet and the buyer and seller can retain their anonymity. The sale of a firearm or drugs on the other hand requires a physical delivery address. Nefarious actors can readily purchase usernames and passwords for online streaming services, stolen financial information and account login credentials, and Social Security numbers, dates of birth, and medical information.<sup>30</sup> As Microsoft warns “[t]he anonymity of the dark web lends itself well to those who would seek to do financial harm to others.”<sup>31</sup>

122. Social Security numbers, for example, are among the worst kind of personal information to have stolen because they may be put to numerous serious fraudulent uses and are difficult for an individual to change. The Social Security Administration stresses that the loss of an individual’s Social Security number, as is the case here, can lead to identity theft and extensive financial fraud:

A dishonest person who has your Social Security number can use it to get other personal information about you. Identity thieves can use your number and your good credit to apply for more credit in your name. Then, they use the credit cards and don’t pay the bills, it damages your credit. You may not find out that someone is using your number until you’re turned down for credit, or you begin to get calls from unknown creditors demanding payment for items you never bought. Someone illegally using your Social Security number and assuming your identity can cause a lot of problems.<sup>32</sup>

123. What’s more, it is no easy task to change or cancel a stolen Social Security number. An individual cannot obtain a new Social Security number without significant paperwork and

---

<sup>29</sup> *What is the Dark Web?* – Microsoft 365, available at <https://www.microsoft.com/en-us/microsoft-365-life-hacks/privacy-and-safety/what-is-the-dark-web/> (last accessed June 22, 2023).

<sup>30</sup> *Id.*; *What Is the Dark Web?*, Experian, available at <https://www.experian.com/blogs/ask-experian/what-is-the-dark-web/>. (last accessed June 22, 2023).

<sup>31</sup> *What is the Dark Web?* – Microsoft 365, available at <https://www.microsoft.com/en-us/microsoft-365-life-hacks/privacy-and-safety/what-is-the-dark-web/> (last accessed June 22, 2023).

<sup>32</sup> Social Security Administration, *Identity Theft and Your Social Security Number*, available at: <https://www.ssa.gov/pubs/EN-05-10064.pdf>. (last accessed June 22, 2023).

evidence of actual misuse. In other words, preventive action to defend against the possibility of misuse of a Social Security number is not permitted; an individual must show evidence of actual, ongoing fraud activity to obtain a new number.<sup>33</sup>

124. Even then, a new Social Security number may not be effective, as “[t]he credit bureaus and banks are able to link the new number very quickly to the old number, so all of that old bad information is quickly inherited into the new Social Security number.”<sup>34</sup>

125. Identity thieves can also use Social Security numbers to obtain a driver’s license or official identification card in the victim’s name but with the thief’s picture, use the victim’s name and Social Security number to obtain government benefits, or file a fraudulent tax return using the victim’s information. In addition, identity thieves may obtain a job using the victim’s Social Security number, rent a house or receive medical services in the victim’s name, and may even give the victim’s personal information to police during an arrest resulting in an arrest warrant being issued in the victim’s name. And the Social Security Administration has warned that identity thieves can use an individual’s Social Security number to apply for additional credit lines.<sup>35</sup>

126. According to the FBI’s Internet Crime Complaint Center (IC3) 2019 Internet Crime Report, Internet-enabled crimes reached their highest number of complaints and dollar losses that year, resulting in more than \$3.5 billion in losses to individuals and business victims.<sup>36</sup>

127. Further, according to the same report, “rapid reporting can help law enforcement stop fraudulent transactions before a victim loses the money for good.”<sup>37</sup> Defendant did not rapidly

---

<sup>37</sup> *Id.*

report to Plaintiffs and the Class that their Private Information had been stolen.

128. Victims of identity theft also often suffer embarrassment, blackmail, or harassment in person or online, and/or experience financial losses resulting from fraudulently opened accounts or misuse of existing accounts.

129. In addition to out-of-pocket expenses that can exceed thousands of dollars and the emotional toll identity theft can take, some victims have to spend considerable time repairing the damage caused by the theft of their Private Information. Victims of new account identity theft will likely have to spend time correcting fraudulent information in their credit reports and continuously monitor their reports for future inaccuracies, close existing bank/credit accounts, open new ones, and dispute charges with creditors.

130. Further complicating the issues faced by victims of identity theft, data thieves may wait years before attempting to use the stolen Private Information. To protect themselves, Plaintiffs and Class Members will need to remain vigilant against unauthorized data use for years or even decades to come.

131. The FTC has also recognized that consumer data is a new and valuable form of currency. In an FTC roundtable presentation, former Commissioner Pamela Jones Harbour stated that “most consumers cannot begin to comprehend the types and amount of information collected by businesses, or why their information may be commercially valuable. Data is currency. The larger the data set, the greater potential for analysis and profit.”<sup>38</sup>

132. The FTC has also issued numerous guidelines for businesses that highlight the importance of reasonable data security practices. The FTC has noted the need to factor data

---

<sup>38</sup> Statement of FTC Commissioner Pamela Jones Harbour (Remarks Before FTC Exploring Privacy Roundtable), <http://www.ftc.gov/speeches/harbour/091207privacyroundtable.pdf> (last accessed June 22, 2023).

security into all business decision-making. According to the FTC, data security requires: (i) encrypting information stored on computer networks; (ii) retaining payment card information only as long as necessary; (iii) properly disposing of personal information that is no longer needed; (iv) limiting administrative access to business systems; (v) using industry-tested and accepted methods for securing data; (vi) monitoring activity on networks to uncover unapproved activity; (vii) verifying that privacy and security features function properly; (viii) testing for common vulnerabilities; and (ix) updating and patching third-party software.<sup>39</sup>

133. Defendant’s failure to properly notify Plaintiffs and Class Members of the Data Breach exacerbated Plaintiffs’ and Class Members’ injury by depriving them of the earliest ability to take appropriate measures to protect their Private Information and take other necessary steps to mitigate the harm caused by the Data Breach.

***Loss of Time to Mitigate the Risk of Identify Theft and Fraud***

134. As a result of the recognized risk of identity theft, when a Data Breach occurs, and an individual is notified by a company that their Private Information was compromised, the reasonable person is expected to take steps and spend time to address the dangerous situation, learn about the breach, and otherwise mitigate the risk of becoming a victim of identity theft or fraud. Failure to spend time taking steps to review accounts or credit reports could expose the individual to greater financial harm – yet, the resource and asset of time has been lost.

135. Class Members have spent, and will spend additional time in the future, on a variety of prudent actions, such as placing “freezes” and “alerts” with credit reporting agencies, contacting financial institutions, closing or modifying financial accounts, changing passwords, reviewing and

---

<sup>39</sup> See generally <https://www.ftc.gov/business-guidance/resources/protecting-personal-information-guide-business>. (last accessed June 22, 2023).

monitoring credit reports and accounts for unauthorized activity, and filing police reports, which may take years to discover and detect.

136. These mitigation efforts are consistent with the U.S. Government Accountability Office that released a report in 2007 regarding data breaches (“GAO Report”) in which it noted that victims of identity theft will face “substantial costs and time to repair the damage to their good name and credit record.”<sup>40</sup>

137. These mitigation efforts are also consistent with the steps that FTC recommends that data breach victims take to protect their personal and financial information after a data breach, including: contacting one of the credit bureaus to place a fraud alert (and consider an extended fraud alert that lasts for seven years if someone steals their identity), reviewing their credit reports, contacting companies to remove fraudulent charges from their accounts, placing a credit freeze on their credit, and correcting their credit reports.<sup>41</sup>

138. In the event that Plaintiffs and Class Members experience actual identity theft and fraud, the GAO Report noted that victims of identity theft will face “substantial costs and time to repair the damage to their good name and credit record.”<sup>42</sup> Indeed, the FTC recommends that identity theft victims take several steps and spend time to protect their personal and financial information after a data breach, including contacting one of the credit bureaus to place a fraud alert (consider an extended fraud alert that lasts for 7 years if someone steals their identity), reviewing their credit reports, contacting companies to remove fraudulent charges from their accounts,

---

<sup>40</sup> See United States Government Accountability Office, GAO-07-737, Personal Information: Data Breaches Are Frequent, but Evidence of Resulting Identity Theft Is Limited; However, the Full Extent Is Unknown (June 2007), <https://www.gao.gov/new.items/d07737.pdf>. (last accessed June 22, 2023).

<sup>41</sup> See Federal Trade Commission, Identity Theft.gov, <https://www.identitytheft.gov/Steps> (last accessed June 22, 2023).

<sup>42</sup> See “Data Breaches Are Frequent, but Evidence of Resulting Identity Theft Is Limited; However, the Full Extent Is Unknown,” p. 2, U.S. Government Accountability Office, June 2007, <https://www.gao.gov/new.items/d07737.pdf> (last accessed June 22, 2023). (“GAO Report”).

placing a credit freeze on their credit, and correcting their credit reports.<sup>43</sup>

***Diminution of Value of the Private Information***

139. Private Information is a valuable property right.<sup>44</sup> Its value is axiomatic, considering the value of Big Data in corporate America and the consequences of cyber thefts include heavy prison sentences. Even this obvious risk to reward analysis illustrates beyond doubt that Private Information has considerable market value.

140. An active and robust legitimate marketplace for Private Information also exists. In 2019, the data brokering industry was worth roughly \$200 billion.<sup>45</sup> In fact, the data marketplace is so sophisticated that consumers can actually sell their non-public information directly to a data broker who in turn aggregates the information and provides it to marketers or app developers.<sup>46</sup> Consumers who agree to provide their web browsing history to the Nielsen Corporation can receive up to \$50.00 a year.<sup>47</sup>

141. As a result of the Data Breach, Plaintiffs' and Class Members' Private Information, which has an inherent market value in both legitimate and dark markets, has been damaged and diminished in its value by its unauthorized and potential release onto the Dark Web, where it may soon be available and holds significant value for the threat actors.

***Future Cost of Credit and Identify Theft Monitoring Is Reasonable and Necessary***

142. To date, Defendant has done little to provide Plaintiffs and Class Members with

---

<sup>43</sup> See <https://www.identitytheft.gov/Steps> (last accessed June 22, 2023).

<sup>44</sup> See, e.g., John T. Soma, et al, Corporate Privacy Trend: The "Value" of Personally Identifiable Information ("Private Information") Equals the "Value" of Financial Assets, 15 Rich. J.L. & Tech. 11, at \*3-4 (2009) ("Private Information, which companies obtain at little cost, has quantifiable value that is rapidly reaching a level comparable to the value of traditional financial assets.") (citations omitted) (last accessed June 22, 2023).

<sup>45</sup> <https://www.latimes.com/business/story/2019-11-05/column-data-brokers> (last accessed June 22, 2023).

<sup>46</sup> <https://datacoup.com/> (last accessed June 22, 2023).

<sup>47</sup> Nielsen Computer & Mobile Panel, Frequently Asked Questions, available at <https://computermobilepanel.nielsen.com/ui/US/en/faqs.html>. (last accessed June 22, 2023).

relief for the damages they have suffered because of the Data Breach despite Plaintiffs and Class Members being at risk of identity theft and fraud for the foreseeable future.

143. Given the type of targeted attack in this case and sophisticated criminal activity, the type of Private Information (e.g. social security numbers), and the *modus operandi* of cybercriminals, there is a strong probability that entire batches of stolen information have been placed, or will be placed, on the black market/dark web for sale and purchase by criminals intending to utilize the Private Information for identity theft crimes – e.g., opening bank accounts in the victims’ names to make purchases or to launder money; file false tax returns; take out loans or lines of credit; or file false unemployment claims.

144. It must be noted there may be a substantial time lag – measured in years – between when harm occurs versus when it is discovered, and between when Private Information is stolen and when it is used. According to the U.S. Government Accountability Office, which conducted a study regarding data breaches:

[L]aw enforcement officials told us that in some cases, stolen data may be held for up to a year or more before being used to commit identity theft. Further, once stolen data have been sold or posted on the Web, fraudulent use of that information may continue for years. As a result, studies that attempt to measure the harm resulting from data breaches cannot necessarily rule out all future harm.

*See* GAO Report, at 29.

145. Such fraud may go undetected until debt collection calls commence months, or even years, later. An individual may not know that their Social Security Number was used to file for unemployment benefits until law enforcement notifies the individual’s employer of the suspected fraud. Fraudulent tax returns are typically discovered only when an individual’s authentic tax return is rejected.

146. Furthermore, the information accessed and disseminated in the Data Breach is

significantly more valuable than the loss of, for example, credit card information in a retailer data breach, where victims can easily cancel or close credit and debit card accounts.<sup>48</sup> The information disclosed in this Data Breach is impossible to “close” and difficult, if not impossible, to change (such as Social Security numbers).

147. Consequently, Plaintiffs and Class Members are at a present and ongoing risk of fraud and identity theft for their entire lives.

148. The retail cost of credit monitoring and identity theft monitoring can cost around \$200 a year per Class Member. This is a reasonable and necessary cost to protect Class Members from the ongoing risk of identity theft that arose from Defendant’s Data Breach, a risk that will remain long after any credit monitoring offered by Defendant expires. This is a recurring future cost that Plaintiffs and Class Members would not need to bear but for Defendant’s failure to safeguard their Private Information.

***Injunctive Relief Is Necessary to Protect Against Future Data Breaches***

149. Moreover, Plaintiffs and Class Members have an interest in ensuring that their Private Information, which is believed to remain in the control of Defendant, is protected from further breaches by the implementation of security measures and safeguards, including but not limited to, making sure that the storage of data or documents containing Private Information is not accessible online and that access to such data is password protected.

**CLASS ACTION ALLEGATIONS**

150. Plaintiffs bring this nationwide class action on behalf of themselves and on behalf of others similarly situated pursuant to Rule 23(b)(2), 23(b)(3), and 23(c)(4) of the Federal Rules

---

<sup>48</sup> See Jesse Damiani, *Your Social Security Number Costs \$4 On The Dark Web, New Report Finds*, FORBES (Mar. 25, 2020), <https://www.forbes.com/sites/jessedamiani/2020/03/25/your-social-security-number-costs-4-on-the-dark-web-new-report-finds/?sh=6a44b6d513f1>. (last accessed June 22, 2023).

of Civil Procedure.

151. The Nationwide Class that Plaintiffs seek to represent is defined as follows:

All persons whose Private Information was accessed or acquired during the Data Breach as a result of the exploitation of Progress Software Corporation's MOVEit Application vulnerability (the "Class").

With an "Allegheny County Subclass" defined as follows:

All persons whose Private Information was maintained by Allegheny County and accessed or acquired during the Data Breach as a result of the exploitation of Progress Software Corporation's MOVEit Application vulnerability (the "Allegheny County Subclass").

152. Excluded from the Class are the following individuals and/or entities: Defendant and Defendant's parents, subsidiaries, affiliates, officers and directors, and any entity in which Defendant has a controlling interest; all individuals who make a timely election to be excluded from this proceeding using the correct protocol for opting out; any and all federal, state or local governments, including but not limited to their departments, agencies, divisions, bureaus, boards, sections, groups, counsels and/or subdivisions; and all judges assigned to hear any aspect of this litigation, as well as their immediate family members.

153. Plaintiffs reserve the right to modify or amend the definition of the proposed Class before the Court determines whether certification is appropriate.

154. Numerosity, Fed. R. Civ. P. 23(a)(1): Class Members are so numerous that joinder of all members is impracticable. Upon information and belief, there are millions of individuals whose Private Information may have been improperly accessed in the Data Breach, and the Class is readily identifiable within Defendant's records.

155. Commonality, Fed. R. Civ. P. 23(a)(2) and (b)(3): Questions of law and fact common to the Class exist and predominate over any questions affecting only individual Class Members. These include:

- a. Whether and to what extent Defendant had a duty to protect the Private Information of Plaintiffs and Class Members;
- b. Whether Defendant had duties not to disclose the Private Information of Plaintiffs and Class Members to unauthorized third parties;
- c. Whether Defendant had duties not to use the Private Information of Plaintiffs and Class Members for non-business purposes;
- d. Whether Defendant failed to adequately safeguard the Private Information of Plaintiffs and Class Members;
- e. Whether and when Defendant actually learned of the Data Breach;
- f. Whether Defendant adequately, promptly, and accurately informed Plaintiffs and Class Members that their Private Information had been compromised;
- g. Whether Defendant violated the law by failing to promptly notify Plaintiffs and Class Members that their Private Information had been compromised;
- h. Whether Defendant failed to implement and maintain reasonable security procedures and practices appropriate to the nature and scope of the information compromised in the Data Breach;
- i. Whether Defendant adequately addressed and fixed the vulnerabilities which permitted the Data Breach to occur;
- j. Whether Defendant engaged in unfair, unlawful, or deceptive practices by failing to safeguard the Private Information of Plaintiffs and Class Members;
- k. Whether Plaintiffs and Class Members are entitled to actual, consequential, and/or nominal damages as a result of Defendant's wrongful conduct;
- l. Whether Plaintiffs and Class Members are entitled to restitution as a result of Defendant's wrongful conduct; and
- m. Whether Plaintiffs and Class Members are entitled to injunctive relief to redress the imminent and currently ongoing harm faced as a result of the Data Breach.

156. Typicality, Fed. R. Civ. P. 23(a)(3): Plaintiffs' claims are typical of those of other Class Members because all had their Private Information compromised as a result of the Data Breach, due to Defendant's misfeasance.

157. Predominance. Defendant has engaged in a common course of conduct toward

Plaintiffs and Class Members, in that all the Plaintiffs' and Class Members' data was maintained and unlawfully accessed in the same way. The common issues arising from Defendant's conduct affecting Class Members set out above predominate over any individualized issues. Adjudication of these common issues in a single action has important and desirable advantages of judicial economy. Defendant's policies challenged herein apply to and affect Class Members uniformly and Plaintiffs' challenge of these policies hinges on Defendant's conduct with respect to the Class as a whole, not on facts or law applicable only to Plaintiffs.

158. Adequacy of Representation, Fed. R. Civ. P. 23(a)(4): Plaintiffs will fairly and adequately represent and protect the interests of the Class Members in that Plaintiffs has no disabling conflicts of interest that would be antagonistic to those of the other Members of the Class. Plaintiffs seek no relief that is antagonistic or adverse to the Members of the Class and the infringement of the rights and the damages Plaintiffs have suffered are typical of other Class Members. Plaintiffs have also retained counsel experienced in complex class action litigation, and Plaintiffs intend to prosecute this action vigorously.

159. Superiority, Fed. R. Civ. P. 23(b)(3): Class litigation is an appropriate method for fair and efficient adjudication of the claims involved. Class action treatment is superior to all other available methods for the fair and efficient adjudication of the controversy alleged herein; it will permit a large number of Class Members to prosecute their common claims in a single forum simultaneously, efficiently, and without the unnecessary duplication of evidence, effort, and expense that hundreds of individual actions would require. Class action treatment will permit the adjudication of relatively modest claims by certain Class Members, who could not individually afford to litigate a complex claim against large corporations, like Defendant. Further, even for those Class Members who could afford to litigate such a claim, it would still be economically

impractical and impose a burden on the courts.

160. The nature of this action and the nature of laws available to Plaintiffs and Class Members make the use of the class action device a particularly efficient and appropriate procedure to afford relief to Plaintiffs and Class Members for the wrongs alleged because Defendant would necessarily gain an unconscionable advantage since it would be able to exploit and overwhelm the limited resources of each individual Class Member with superior financial and legal resources; the costs of individual suits could unreasonably consume the amounts that would be recovered; proof of a common course of conduct to which Plaintiffs were exposed is representative of that experienced by the Class and will establish the right of each Class Member to recover on the cause of action alleged; and individual actions would create a risk of inconsistent results and would be unnecessary and duplicative of this litigation.

161. The litigation of the claims brought herein is manageable. Defendant's uniform conduct, including its privacy policy, Defendant's uniform methods of data collection, the consistent provisions of the relevant laws, and the ascertainable identities of Class Members demonstrate that there would be no significant manageability problems with prosecuting this lawsuit as a class action.

162. Adequate notice can be given to Class Members directly using information maintained in Defendant's records.

163. Unless a Class-wide injunction is issued, Defendant may continue in its failure to properly secure the Private Information of Class Members, Defendant may continue to refuse to provide proper notification to Class Members regarding the Data Breach, and Defendant may continue to act unlawfully as set forth in this Petition.

164. Further, Defendant has acted or refused to act on grounds generally applicable to

the Class and, accordingly, class certification, injunctive relief, and corresponding declaratory relief are appropriate on a Class-wide basis.

165. Likewise, particular issues under Rule 23(c)(4) are appropriate for certification because such claims present only particular, common issues, the resolution of which would advance the disposition of this matter and the parties' interests therein. Such particular issues include, but are not limited to:

- a. Whether Defendant owed a legal duty to Plaintiffs and Class Members to exercise due care in obtaining, storing, collecting, maintaining, using, and/or safeguarding their Private Information;
- b. Whether Defendant breached a legal duty to Plaintiffs and Class Members to exercise due care in obtaining, storing, collecting, maintaining, using, and/or safeguarding their Private Information;
- c. Whether Defendant failed to comply with its own policies and applicable laws, regulations, and industry standards relating to data security;
- d. Whether Defendant adequately and accurately informed Plaintiffs and Class Members that their Private Information had been compromised;
- e. Whether Defendant failed to implement and maintain reasonable security procedures and practices appropriate to the nature and scope of the information compromised in the Data Breach;
- f. Whether Defendant's data security practices related to its MOVEit Application prior to and during the Data Breach complied with applicable data security laws and regulations;
- g. Whether Defendant's data security practices related to its MOVEit Application prior to and during the Data Breach were consistent with industry standards;
- h. Whether hackers obtained Class Members' Private Information via the Data Breach;
- i. Whether Defendant breached its duty to provide timely and accurate notice of the Data Breach to Plaintiffs and Class Members; and
- j. Whether Class Members are entitled to actual, consequential, and/or nominal damages, and/or injunctive relief as a result of Defendant's wrongful conduct.

**CAUSES OF ACTION**

**COUNT I**  
**NEGLIGENCE**

**(On Behalf of Plaintiffs and All Class Members)**

166. Plaintiffs and the Class repeat and re-allege each and every allegation as if fully set forth herein.

167. Defendant knowingly collected, acquired, stored, and/or maintained Plaintiffs' and Class Members' Private Information, and had a duty to exercise reasonable care in safeguarding, securing, and protecting the Private Information from being disclosed, compromised, lost, stolen, and misused by unauthorized parties.

168. The duty included obligations to take reasonable steps to prevent disclosure of the Private Information, and to safeguard the information from theft. Defendant's duties included the responsibility to design, implement, and monitor data security systems, policies, and processes to protect against reasonably foreseeable data breaches such as this Data Breach.

169. Defendant owed a duty of care to Plaintiffs and Class Members to provide data security consistent with industry standards and other requirements discussed herein, and to ensure that its systems and networks, policies, and procedures, and the personnel responsible for them, adequately protected the Private Information.

170. Defendant owed a duty of care to safeguard the Private Information due to the foreseeable risk of a data breach and the severe consequences that would result from its failure to so safeguard the Private Information.

171. Defendant's duty of care to use reasonable security measures arose as a result of the special relationship that existed between Defendant and those individuals who entrusted them with their Private Information, which is recognized by laws and regulations including but not

limited the FTC Act, as well as common law. Defendant was in a position to ensure that its systems were sufficient to protect against the foreseeable risk of harm to Class Members from a data breach.

172. In addition, Defendant had a duty to employ reasonable security measures under Section 5 of the Federal Trade Commission Act, 15 U.S.C. § 45, which prohibits “unfair . . . practices in or affecting commerce,” including, as interpreted and enforced by the FTC, the unfair practice of failing to use reasonable measures to protect confidential data.

173. Defendant’s duty to use reasonable care in protecting Private Information arose not only as a result of the statutes and regulations described above, but also because Defendant is bound by industry standards to protect Private Information that it either acquires, maintains, or stores.

174. Defendant breached its duties, and thus was negligent, by failing to use reasonable measures to protect Plaintiffs’ and Class Members’ Private Information, as alleged and discussed above.

175. It was foreseeable that Defendant’s failure to use reasonable measures to protect Class Members’ Private Information would result in injury to Plaintiffs and Class Members. Further, the breach of security was reasonably foreseeable given the known high frequency of cyberattacks and data breaches in the data transfer and storage industry.

176. It was therefore foreseeable that the failure to adequately safeguard Class Members’ Private Information would result in one or more types of injuries to Class Members.

177. The imposition of a duty of care on Defendant to safeguard the Private Information it maintained is appropriate because any social utility of Defendant’s conduct is outweighed by the injuries suffered by Plaintiffs and Class Members as a result of the Data Breach.

178. As a direct and proximate result of Defendant’s negligence, Plaintiffs and Class

Members are at a current and ongoing risk of identity theft, and Plaintiffs and Class Members sustained compensatory damages including: (i) invasion of privacy; (ii) financial “out-of-pocket” costs incurred mitigating the materialized risk and imminent threat of identity theft; (iii) loss of time and loss of productivity incurred mitigating the materialized risk and imminent threat of identity theft risk; (iv) financial “out-of-pocket” costs incurred due to actual identity theft; (v) loss of time incurred due to actual identity theft; (vi) loss of time due to increased spam and targeted marketing emails; (vii) diminution of value of their Private Information; (viii) future costs of identity theft monitoring; (ix) anxiety, annoyance and nuisance, and (x) the continued risk to their Private Information, which remains in Defendant’s control, and which is subject to further breaches, so long as Defendant fails to undertake appropriate and adequate measures to protect Plaintiffs’ and Class Members’ Private Information.

179. Plaintiffs and Class Members are entitled to compensatory and consequential damages suffered as a result of the Data Breach.

180. Defendant’s negligent conduct is ongoing, in that it still holds the Private Information of Plaintiffs and Class Members in an unsafe and unsecure manner.

181. Plaintiffs and Class Members are also entitled to injunctive relief requiring Defendant to (i) strengthen its data security systems and monitoring procedures; (ii) submit to future annual audits of those systems and monitoring procedures; and (iii) continue to provide adequate credit monitoring to all Class Members.

**COUNT II**  
**BREACH OF THIRD-PARTY BENEFICIARY CONTRACT**  
**(On Behalf of Plaintiffs and All Class Members)**

182. Plaintiffs and the Class repeat and re-allege each and every allegation as if fully set forth herein.

183. Upon information and belief, PSC entered into contracts with its government and corporate customers to provide secure file transfer services to them; services that included data security practices, procedures, and protocols sufficient to safeguard the Private Information that was entrusted to it.

184. Such contracts were made expressly for the benefit of Plaintiffs and the Class, as it was their Private Information that Defendant agreed to receive, store, utilize, transfer, and protect through its services. Thus, the benefit of collection and protection of the Private Information belonging to Plaintiffs and the Class was the direct and primary objective of the contracting parties and Plaintiffs and Class Members were direct and express beneficiaries of such contracts.

185. Defendant knew or should have known that if it were to breach these contracts with its customers, Plaintiffs and Class Members would be harmed.

186. Defendant breached its contracts with customers by, among other things, failing to adequately secure Plaintiffs and Class Members' Private Information, and, as a result, Plaintiffs and Class Members were harmed by Defendant's failure to secure their Private Information.

187. As a direct and proximate result of Defendant's breach, Plaintiffs and Class Members are at a current and ongoing risk of identity theft, and Plaintiffs and Class Members sustained incidental and consequential damages including: (i) financial "out-of-pocket" costs incurred mitigating the materialized risk and imminent threat of identity theft; (ii) loss of time and loss of productivity incurred mitigating the materialized risk and imminent threat of identity theft risk; (iii) financial "out-of-pocket" costs incurred due to actual identity theft; (iv) loss of time incurred due to actual identity theft; (v) loss of time due to increased spam and targeted marketing emails; (vi) diminution of value of their Private Information; (vii) future costs of identity theft monitoring; (viii) and the continued risk to their Private Information, which remains in

Defendant's control, and which is subject to further breaches, so long as Defendant fails to undertake appropriate and adequate measures to protect Plaintiffs' and Class Members' Private Information.

188. Plaintiffs and Class Members are entitled to compensatory, consequential, and nominal damages suffered as a result of the Data Breach.

189. Plaintiffs and Class Members are also entitled to injunctive relief requiring Defendant to, e.g., (i) strengthen its data security systems and monitoring procedures; (ii) submit to future annual audits of those systems and monitoring procedures; and (iii) immediately provide adequate credit monitoring to all Class Members.

**COUNT III**  
**NEGLIGENCE *PER SE***  
**(On Behalf of Plaintiffs and All Class Members)**

190. Plaintiffs and the Class repeat and re-allege each and every allegation as if fully set forth herein.

191. Pursuant to Federal Trade Commission, 15 U.S.C. § 45, Defendant had a duty to provide fair and adequate computer systems and data security practices to safeguard Plaintiffs' and Class Members' Private Information.

192. Defendant breached its duties to Plaintiffs and Class Members under the FTC Act by failing to provide fair, reasonable, or adequate computer systems and data security practices to safeguard Plaintiffs' and Class Members' Private Information.

193. Defendant's failure to comply with applicable laws and regulations constitutes negligence per se.

194. But for Defendant's wrongful and negligent breach of its duties owed to Plaintiffs and Class Members, Plaintiffs and Class Members would not have been injured.

195. The injury and harm suffered by Plaintiffs and Class Members were the reasonably foreseeable result of Defendant's breach of its duties. Defendant knew or should have known that it was failing to meet its duties, and that Defendant's breach would cause Plaintiffs and Class Members to experience the foreseeable harms associated with the exposure of their Private Information.

196. As a direct and proximate result of Defendant's negligence, Plaintiffs and Class Members are at a current and ongoing risk of identity theft, and Plaintiffs and Class Members sustained compensatory damages including: (i) invasion of privacy; (ii) financial "out-of-pocket" costs incurred mitigating the materialized risk and imminent threat of identity theft; (iii) loss of time and loss of productivity incurred mitigating the materialized risk and imminent threat of identity theft risk; (iv) financial "out-of-pocket" costs incurred due to actual identity theft; (v) loss of time incurred due to actual identity theft; (vi) loss of time due to increased spam and targeted marketing emails; (vii) diminution of value of their Private Information; (viii) future costs of identity theft monitoring; (ix) anxiety, annoyance and nuisance, and (x) the continued risk to their Private Information, which remains in Defendant's control, and which is subject to further breaches, so long as Defendant fails to undertake appropriate and adequate measures to protect Plaintiffs' and Class Members' Private Information.

197. Plaintiffs and Class Members are entitled to compensatory, consequential, and nominal damages suffered as a result of the Data Breach.

198. Plaintiffs and Class Members are also entitled to injunctive relief requiring Defendant to, e.g., (i) strengthen its data security systems and monitoring procedures; (ii) submit to future annual audits of those systems and monitoring procedures; and (iii) immediately provide adequate credit monitoring to all Class Members.

**COUNT IV**  
**UNJUST ENRICHMENT**  
**(On Behalf of Plaintiffs and All Class Members)**

199. Plaintiffs and the Class repeat and re-allege each and every allegation as if fully set forth herein.

200. Plaintiffs and Class Members conferred a monetary benefit on Defendant by providing Defendant with their valuable Private Information.

201. Defendant enriched itself by saving the costs it reasonably should have expended on data security measures to secure Plaintiffs' and Class Members' Private Information, which cost savings increased the profitability of the services.

202. Upon information and belief, instead of providing a reasonable level of security that would have prevented the Data Breach, Defendant instead calculated to avoid its data security obligations at the expense of Plaintiffs and Class Members by utilizing cheaper, ineffective security measures. Plaintiffs and Class Members, on the other hand, suffered as a direct and proximate result of Defendant's failure to provide the requisite security.

203. Under the principles of equity and good conscience, Defendant should not be permitted to retain the monetary value of the benefit belonging to Plaintiffs and Class Members, because Defendant failed to implement appropriate data management and security measures that are mandated by industry standards.

204. Defendant acquired the monetary benefit, Private Information, through inequitable means in that it failed to disclose the inadequate security practices previously alleged.

205. Had Plaintiffs and Class Members known that Defendant had not secured their Private Information, they would not have agreed to provide their Private Information to Defendant. Plaintiffs and Class Members have no adequate remedy at law.

206. As a direct and proximate result of Defendant's conduct, Plaintiffs and Class Members have suffered and will continue to suffer other forms of injury and/or harm.

207. Furthermore, as a direct and proximate result of Defendant's unreasonable and inadequate data security practices, Plaintiffs and Class Members are at a current and ongoing risk of identity theft and have sustained incidental and consequential damages, including: (i) financial "out-of-pocket" costs incurred mitigating the materialized risk and imminent threat of identity theft; (ii) loss of time and loss of productivity incurred mitigating the materialized risk and imminent threat of identity theft risk; (iii) financial "out-of-pocket" costs incurred due to actual identity theft; (iv) loss of time incurred due to actual identity theft; (v) loss of time due to increased spam and targeted marketing emails; (vi) diminution of value of their Private Information; (vii) future costs of identity theft monitoring; and (viii) the continued risk to their Private Information, which remains in Defendant's control, and which is subject to further breaches, so long as Defendant fails to undertake appropriate and adequate measures to protect Plaintiffs' and Class Members' Private Information.

208. Plaintiffs and Class Members are entitled to compensatory, consequential, and nominal damages suffered as a result of the Data Breach.

209. Plaintiffs and Class Members are also entitled to injunctive relief requiring Defendant to, e.g., (i) strengthen its data security systems and monitoring procedures; (ii) submit to future annual audits of those systems and monitoring procedures; and (iii) immediately provide adequate credit monitoring to all Class Members.

210. Moreover, Defendant should be compelled to disgorge into a common fund or constructive trust, for the benefit of Plaintiffs and Class Members, proceeds that it unjustly received from them.

**COUNT V**  
**DECLARATORY AND INJUNCTIVE RELIEF**  
**(On Behalf of Plaintiffs and All Class Members)**

211. Plaintiffs and the Class repeat and re-allege each and every allegation as if fully set forth herein.

212. Plaintiffs pursue this claim under the Federal Declaratory Judgment Act, 28 U.S.C. § 2201.

213. Under the Declaratory Judgment Act, 28 U.S.C. §§ 2201, et seq., this Court is authorized to enter a judgment declaring the rights and legal relations of the parties and granting further necessary relief. Furthermore, the Court has broad authority to restrain acts, such as here, that are tortious and violate the terms of the federal statutes described in this Complaint.

214. An actual controversy has arisen in the wake of the Data Breach regarding Defendant's present and prospective common law and other duties to reasonably safeguard Plaintiffs' and Class Members' Private Information, and whether Defendant is currently maintaining data security measures adequate to protect Plaintiffs and Class Members from future data breaches that compromise their Private Information. Plaintiffs and the Class remain at imminent risk that further compromises of their Private Information will occur in the future.

215. The Court should also issue prospective injunctive relief requiring Defendant to employ adequate security practices consistent with law and industry standards to protect Plaintiffs' and Class Members' Private Information.

216. Defendant still controls the Private Information of Plaintiffs and the Class Members.

217. To Plaintiffs' knowledge, Defendant has made no announcement that it has changed its data or security practices relating to the Private Information.

218. To Plaintiffs' knowledge, Defendant has made no announcement or notification that it has remedied the vulnerabilities and negligent data security practices that led to the Data Breach.

219. If an injunction is not issued, Plaintiffs and the Class will suffer irreparable injury and lack an adequate legal remedy in the event of another data breach at PSC. The risk of another such breach is real, immediate, and substantial.

220. As described above, actual harm has arisen in the wake of the Data Breach regarding Defendant's contractual obligations and duties of care to provide security measures to Plaintiffs and Class Members. Further, Plaintiffs and Class members are at risk of additional or further harm due to the exposure of their Private Information and Defendant's failure to address the security failings that led to such exposure.

221. There is no reason to believe that Defendant's employee training and security measures are any more adequate now than they were before the breach to meet Defendant's contractual obligations and legal duties.

222. The hardship to Plaintiffs and Class Members if an injunction does not issue exceeds the hardship to Defendant if an injunction is issued. Among other things, if another data breach occurs at PSC, Plaintiffs and Class Members will likely continue to be subjected to fraud, identify theft, and other harms described herein. On the other hand, the cost to Defendant of complying with an injunction by employing reasonable prospective data security measures is relatively minimal, and Defendant has a pre-existing legal obligation to employ such measures.

223. Issuance of the requested injunction will not disserve the public interest. To the contrary, such an injunction would benefit the public by preventing another data breach, thus eliminating the additional injuries that would result to Plaintiffs and Class.

224. Plaintiffs and Class Members seek a declaration (i) that Defendant's existing data security measures do not comply with its contractual obligations and duties of care to provide adequate data security; and (ii) that to comply with its contractual obligations and duties of care, Defendant must implement and maintain reasonable security measures, including, but not limited to, the following:

- a. engage internal security personnel to conduct testing, including audits on Defendant's systems, on a periodic basis, and promptly correct any problems or issues detected by such third-party security auditors;
- b. engage third-party security auditors and internal personnel to run automated security monitoring;
- c. audit, test, and train its security personnel and employees regarding any new or modified data security policies and procedures;
- d. purge, delete, and destroy, in a reasonably secure manner, any Private Information not necessary for its provision of services;
- e. conduct regular database scanning and security checks; and
- f. routinely and continually conduct internal training and education to inform internal security personnel and employees how to safely share and maintain highly sensitive personal information, including but not limited to, Private Information.

### **PRAYER FOR RELIEF**

**WHEREFORE**, Plaintiffs, on behalf of themselves and Class Members, request judgment against Defendant and that the Court grant the following:

- A. For an Order certifying the Class, and appointing Plaintiffs and their Counsel to represent the Class;
- B. For equitable relief enjoining Defendant from engaging in the wrongful conduct complained of herein pertaining to the misuse and/or disclosure of the Private Information of Plaintiffs and Class Members, and from refusing to issue prompt,

complete, any accurate disclosures to Plaintiffs and Class Members;

C. For injunctive relief requested by Plaintiffs, including, but not limited to, injunctive and other equitable relief as is necessary to protect the interests of Plaintiffs and Class Members, including but not limited to an order:

- i. prohibiting Defendant from engaging in the wrongful and unlawful acts described herein;
- ii. requiring Defendant to protect, including through encryption, all data collected through the course of its business in accordance with all applicable regulations, industry standards, and federal, state or local laws;
- iii. requiring Defendant to delete, destroy, and purge the personal identifying information of Plaintiffs and Class Members unless Defendant can provide to the Court reasonable justification for the retention and use of such information when weighed against the privacy interests of Plaintiffs and Class Members;
- iv. requiring Defendant to implement and maintain a comprehensive Information Security Program designed to protect the confidentiality and integrity of the Private Information of Plaintiffs and Class Members;
- v. requiring Defendant to engage independent third-party security auditors/penetration testers as well as internal security personnel to conduct testing, including simulated attacks, penetration tests, and audits on Defendant's systems on a periodic basis, and ordering Defendant to promptly correct any problems or issues detected by such third-party security auditors;
- vi. requiring Defendant to engage independent third-party security auditors and internal personnel to run automated security monitoring;

- vii. requiring Defendant to audit, test, and train its security personnel regarding any new or modified procedures;
- viii. requiring Defendant to segment data by, among other things, creating firewalls and access controls so that if one area of Defendant's network is compromised, hackers cannot gain access to other portions of Defendant's systems;
- ix. requiring Defendant to conduct regular database scanning and securing checks;
- x. requiring Defendant to establish an information security training program that includes at least annual information security training for all employees, with additional training to be provided as appropriate based upon the employees' respective responsibilities with handling personal identifying information, as well as protecting the personal identifying information of Plaintiffs and Class Members;
- xi. requiring Defendant to routinely and continually conduct internal training and education, and on an annual basis to inform internal security personnel how to identify and contain a breach when it occurs and what to do in response to a breach;
- xii. requiring Defendant to implement a system of tests to assess its respective employees' knowledge of the education programs discussed in the preceding subparagraphs, as well as randomly and periodically testing employees compliance with Defendant's policies, programs, and systems for protecting personal identifying information;
- xiii. requiring Defendant to implement, maintain, regularly review, and revise as necessary a threat management program designed to appropriately monitor

Defendant's information networks for threats, both internal and external, and assess whether monitoring tools are appropriately configured, tested, and updated;

- xiv. requiring Defendant to meaningfully educate all Class Members about the threats that they face as a result of the loss of their confidential personal identifying information to third parties, as well as the steps affected individuals must take to protect themselves;
- xv. requiring Defendant to implement logging and monitoring programs sufficient to track traffic to and from Defendant's servers; and for a period of 10 years, appointing a qualified and independent third party assessor to conduct a SOC 2 Type 2 attestation on an annual basis to evaluate Defendant's compliance with the terms of the Court's final judgment, to provide such report to the Court and to counsel for the class, and to report any deficiencies with compliance of the Court's final judgment;

- D. For an award of damages, including, but not limited to, actual, consequential, and nominal damages, as allowed by law in an amount to be determined;
- E. For an award of attorneys' fees, costs, and litigation expenses, as allowed by law;
- F. For prejudgment interest on all amounts awarded; and
- G. Such other and further relief as this Court may deem just and proper.

**DEMAND FOR JURY TRIAL**

Plaintiffs hereby demand that this matter be tried before a jury.

Date: August 28, 2023

Respectfully Submitted,

/s/ Kristen A. Johnson
